

The College of Engineering at Alfaisal University proudly announces the launching of its Summer Camp Program on August 6th, 2017.

The program is conducted in collaboration with Mawhiba Enrichment Program and King Abdulaziz & His Companions foundation for Giftedness & Creativity.

The program has 150 students, males/females, and lasts three weeks.

They will be divided into three tracks:

- 1- Principles of Engineering Design
- 2- Development of Mobile Applications for Smartphone
- 3- Electrical Engineering Track

Alfaisal is making the most out of this initiative and is pairing it with a recycling plan. Recycled cans and bottles will be utilized in Summer Camp projects.
