

Alfaisal University

Bachelor of Mechanical Engineering

Professional Occupations

- Design Engineer
- Production Engineer
- Manufacturing Engineer
- Fabrication Engineer
- Research & Development Engineer
- Tooling Engineer
- Maintenance Engineer
- Process Engineer
- Quality Engineer
- Mechanical Engineer
- Power Engineer
- Consulting Engineer
- Test Engineer
- Sales Engineer
- Analytical Engineer

Program Overview

Mechanical Engineering is concerned with the design, development and manufacturing of machines/mechanical parts and components, based on the principles of engineering, physics and material science. It is one of the oldest and the broadest of the engineering disciplines. Subjects in mechanical engineering overlap with various other engineering branches such as aerospace, architecture, biomedical, civil, chemical, computer, electrical, electronics and communications, industrial, instrumentation, materials, metallurgical, nuclear and petroleum engineering to varying amounts. The engineering field requires an understanding of core concepts including mechanics, kinematics, thermodynamics, material science, structural analysis and power. Mechanical engineers use these core principles along with tools like computer-aided engineering and product life cycle management to design and analyse manufacturing plants, industrial equipment and machinery, heating and cooling systems, transport systems, aircraft, watercraft, robotics, medical devices, military equipment and others.

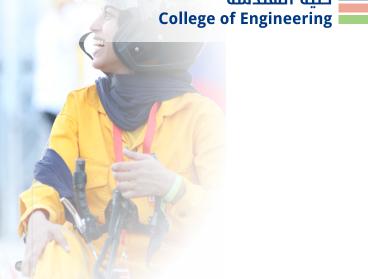

Competitive Edge

The Mechanical Engineering program at Alfaisal University is concerned with up to-date technology, applications, and current industrial needs. The program focuses on producing high-quality graduates and prepare them for the current tough conditions in the field and challenges in the industry. The ME program focuses on three major disciplines; Thermalfluids, Manufacturing, and Design. These three disciplines (based on the principles of engineering, physics and material science) cover energy conversion, power plant technology, air conditioning, renewable energy systems, energy efficiency, development and manufacturing of machines and components, and materials. Our faculty hold degrees from worldrenowned western universities as well as a high-research output in both new and established disciplines; furthermore, small class sizes provide students with the opportunity for individualized instruction.

Engineering Accreditation Commission

ABET Accredited Program

Track & Minor

Optional track & minor are available for students in the areas of:

كلَّىة الهندسة

- Digital Design & Manufacturing Track
- Industrial Engineering Minor

Students will be able to tailor their senior-level technical electives to study new emerging technologies in these areas. In addition, students have the option to take a minor in Industrial Engineering by taking additional 15 CRHs on top of current study plan. More details are available on the department's website.
