AI research, teaching, theory, and practice.

# AI Research Center

A center of excellence for Artificial Intelligence  
AI research, teaching, theory, and practice.

AI at Alfaisal grew out of an interest in problem-solving, a field we pioneered in research and development in the past decade in the Kingdom. We worked on creating and improving upon technologies that observed and reacted to the world around them, so we could continue solving the world's most relevant, timely problems.

Today, our researchers and students work toward one goal: creating AIs that know enough about the real world to solve its problems.

We recognize that AI rests on top of a huge AI Stack that relies on machine learning, programming, data analysis, design, physics and math. Our excellence in all those areas at Alfaisal University is part of what sets Alfaisal's AI Center apart from AI programs around the world.

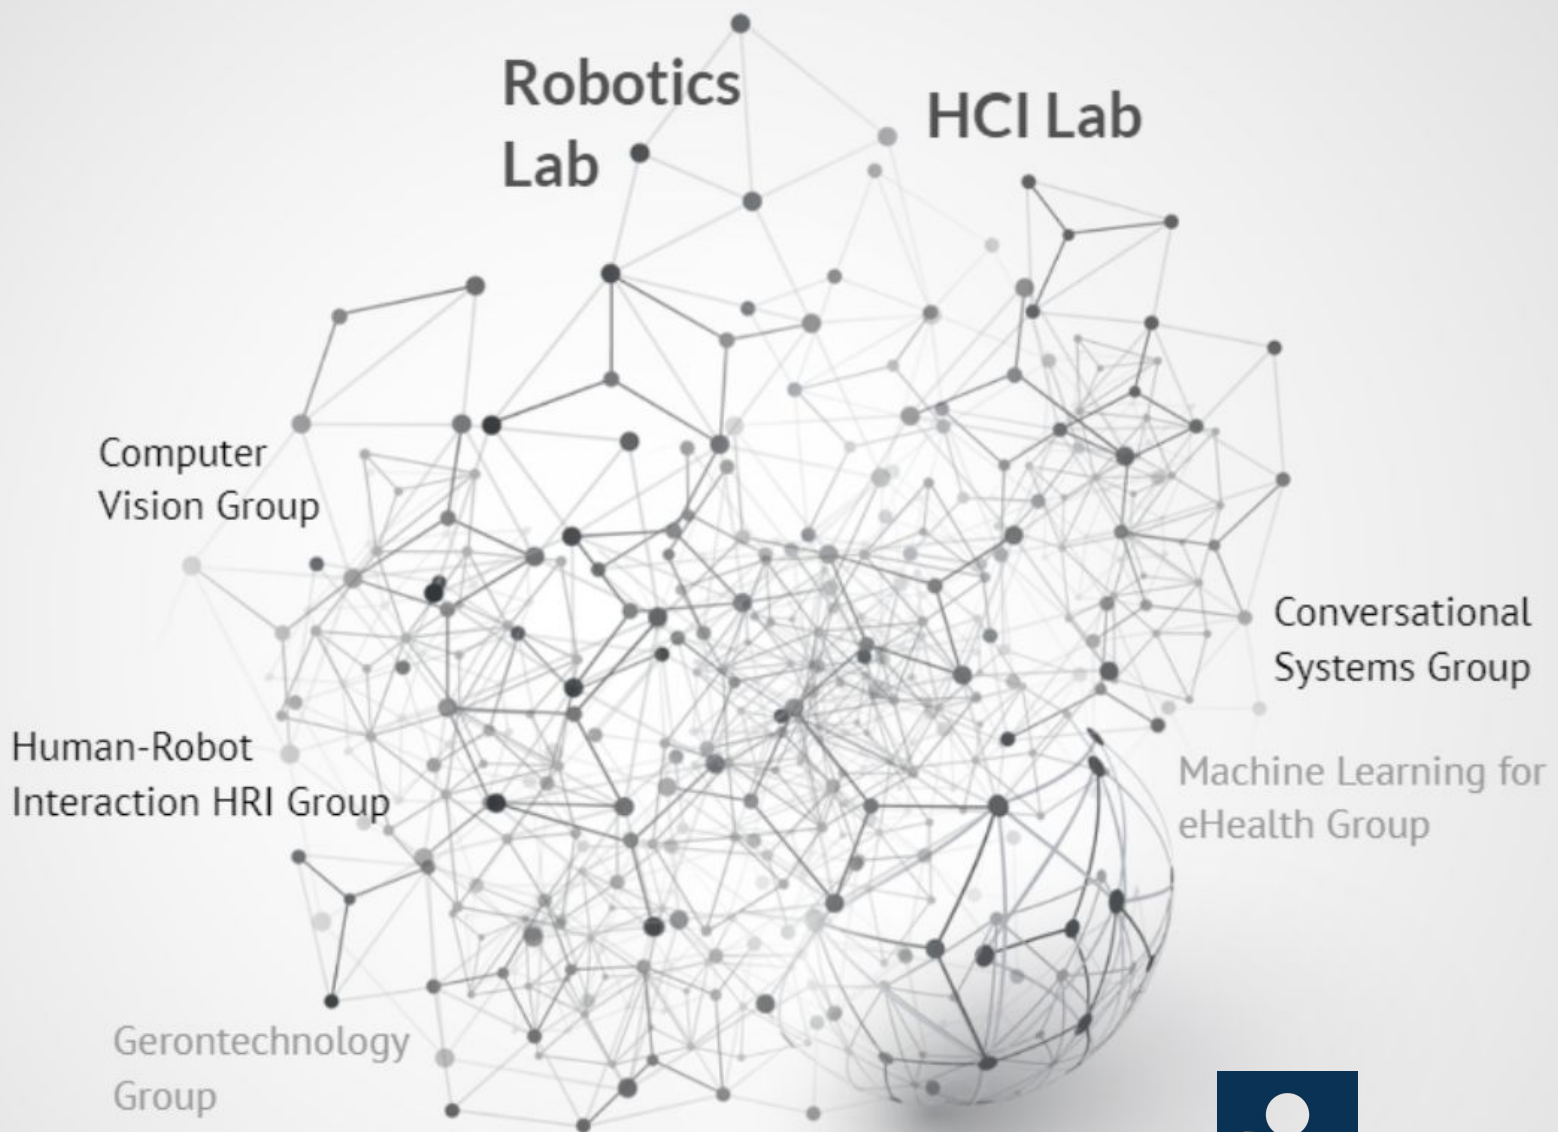

Alfaisal's AI Center fosters a culture where people care deeply about using responsive technology to solve real problems. *We attract doers who solve practical problems.*

A lot of places do AI research. What makes us rise above the competition is our critical mass of the top AI researchers, incredible facilities and resources, and our brilliant students. AI at Alfaisal harnesses faculty and students who spend every day working on the technologies that will improve human lives.

## Research Groups

جامعة الفيصل  
Alfaisal University

# AI Research in 2021-22

Our faculty conduct world class research and are recognized for developing partnerships with industry and the business community. We host diverse research groups conducting pioneering research in all areas of AI including: Robotics, Machine Learning, Deep Learning, NLP, Vision and Learning, Healthcare, AI's societal impact, and AI-connected cognitive and neuroscience.

## Projects in 2021-2022

1. AI for Mental Health KFSHRC
2. Humanistic Co-Design of AT
3. Stroke Covid Data Analytics
4. AI Policy and IP
5. AI Education Curriculum
6. Digital Health with XR

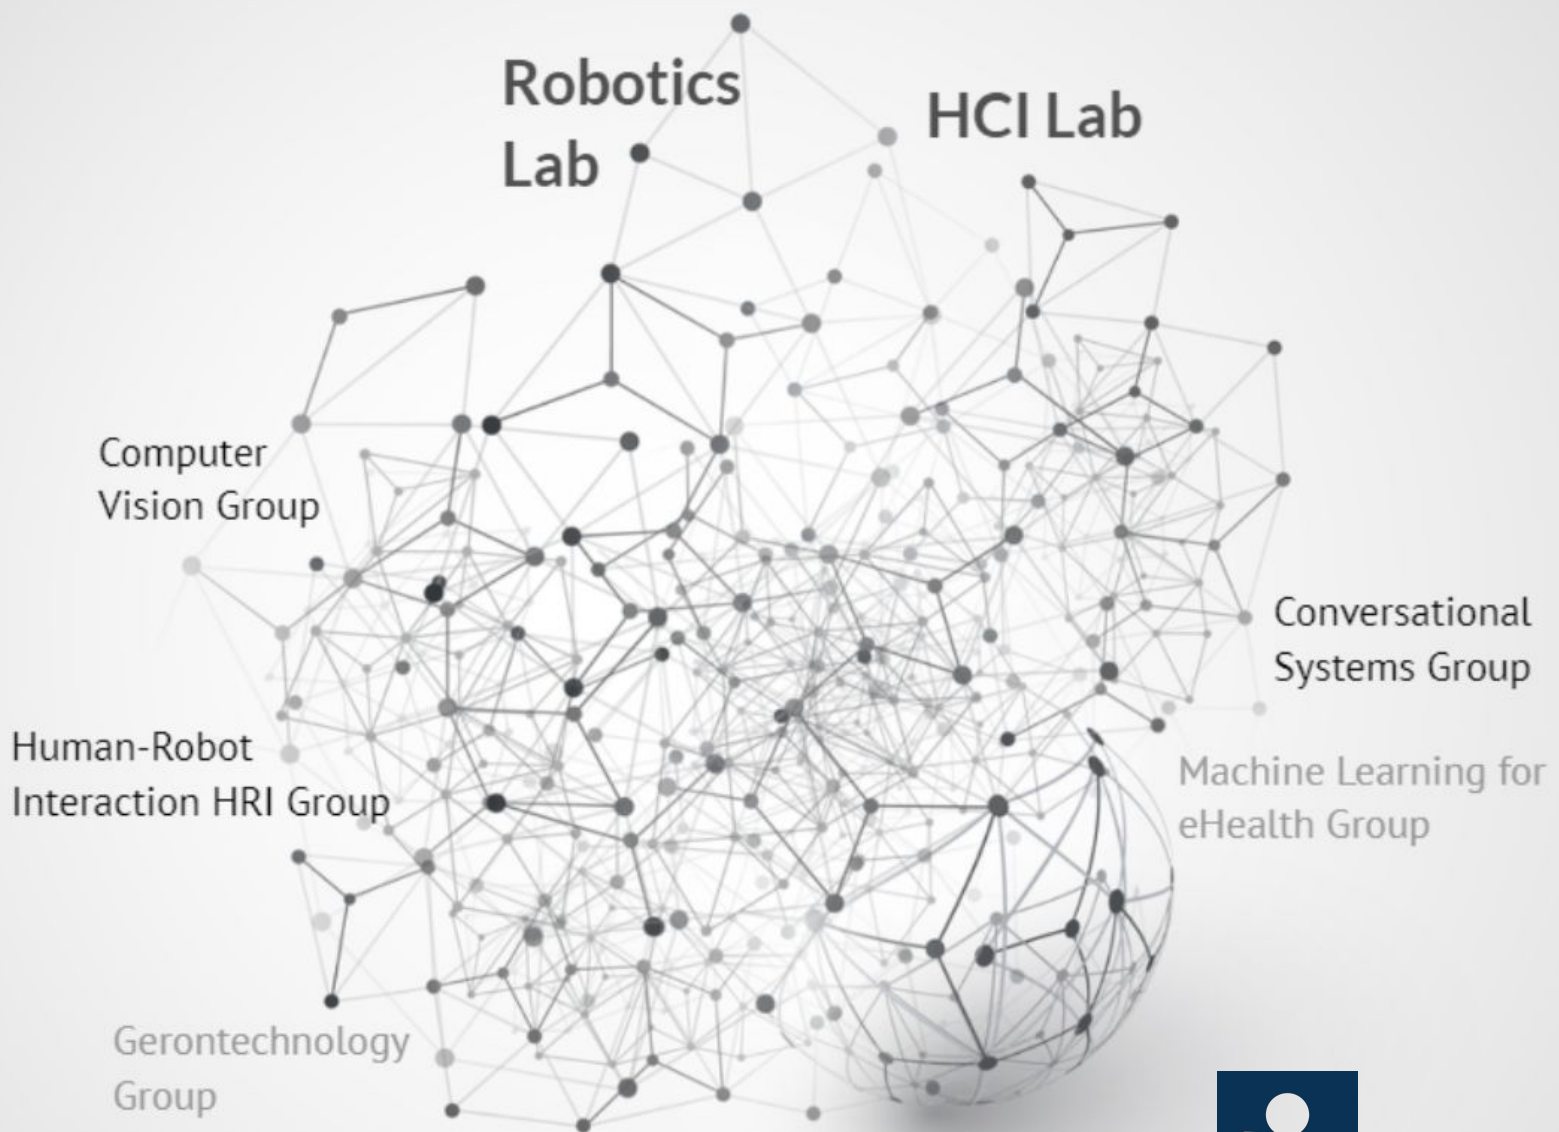

## Partnerships

1. SNMHS at KFSHRC
2. Saudi Health Council & MIT Quest
3. National Neuroscience Institute
4. Saudi Authority for IP & WIPO
5. MIT's AI Education Initiative
6. Elm

The AI Center at Alfaisal University is dynamic and community-oriented, providing many opportunities for research collaboration and accelerated innovation. AI researchers at Alfaisal are committed to advancing knowledge and fostering learning in an atmosphere of discovery and creativity.
